Let's start with some definitions :

What is project management?

- Wikipedia defines project management as “**the discipline** of initiating, planning, **executing**, **controlling**, and **closing** the work of a team to **achieve** specific **goals** and meet specific **success criteria**”

## What is a Project Manager?

- Wikipedia defines a **project manager** as: “a professional in the field of [project management](#). Project managers have the responsibility of **the planning, [procurement](#), and execution of a [project](#)**. Project managers **are first point of contact for any issues** ... This individual seldom participates directly in the activities that produce the end result, but rather **strives to maintain the progress**, mutual interaction and [tasks](#) of various parties in such a way that reduces the risk of overall failure, **maximizes benefits, and minimizes costs.**”

- When does the handoff to the PM take place in your business?
  - When the person is identified as the PM?
  - When the bid goes in?
  - When the PO is awarded?
  - When the work starts at the project site?
- There simply needs to be a point in the project lifecycle where the PM takes the reins

So, back to the Project Manager.....

- Why does this approach make sense?
  - Accountability
  - Empowerment
  - Responsibility
  - Control

We call the Project Manager the “CEO” of the project

How to Implement this approach in your business to ensure success?

- Assess your current Project Manager / Project Coordinator roles within your company
- Determine if these are the right people for the job
- If yes, it is critical to obtain buy-in from the people to make this successful. They have to want to take on the responsibility of each of the areas.
- Accountability and Empowerment are the keys to Success
- Incent the Project Manager position through Key Performance Indicators
- Recognize milestone attainment through reinforcement of the common goals
