Bicsi®

Automated Front Desk with VMS

Give your Visitors an unforgettable experience with our self-service on premise and online visitors management platform. With VMS you get a central, web-based solution that integrates easily with your existing access control solution — and adds full customization and configuration abilities for every location based on business needs.

VMS at a glance

VMS is a web-based solution for managing, identifying and tracking visitor's entry. The system provides full visitor enrolment, manage bookings and track appointment history. It supports pre-registration, self-registration and also provides extensive visitor reporting for greater traceability.

A

Visitors
When visitors check in, they will be presented with company logo and branding.

C

Visitors Notification
Alert visitors of approved bookings, meetings alert, evacuation alert..

Enhance Privacy & Security
Unlike paper guest books, visitor information is kept confidential. And at all times, you know who's in the building.

B

On-Premise booking
With an automated front desk manage your visitors check-in and check out

D

### Pre Booking Management
Allow your visitors to book appointment online. Approve bookings and validate visitors booking.

Save time & Money
Your receptionist can start focusing on productive tasks, instead of updating spreadsheets and calling people around.

Bicsi

Quick features of VMS

VMS is a web-based solution for managing, identifying and tracking visitor's entry. This system will provide full visitor enrolment, manage bookings and track appointment history. It supports activities relating to pre-registration, self-registration and provides extensive visitor reporting for greater traceability.
