# Cabling Installation as a Career

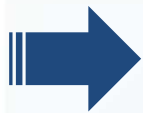

Installers and Technicians install data cables into a building.

Those who perform quality installations are in high demand.

BICSI offers entry-level courses to teach the basics of cabling installation.

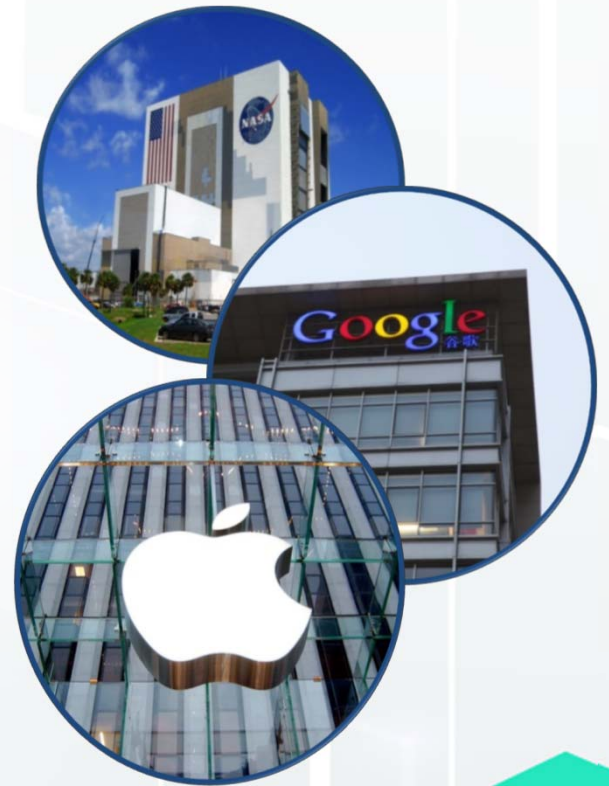

Industry certification is required for many positions, and means higher pay.

# Cabling Installer Job Outlook

High-profile clients include NASA and Fortune 500 companies such as Verizon<sup>®</sup>, Hewlett-Packard<sup>®</sup>, Apple<sup>®</sup>, and Harley-Davidson<sup>®</sup>.

BICSI-trained installers are in higher demand than those without BICSI training or credentialing.

# BICSI's Cabling Installation Program

BICSI's Installation Career Path includes classes, manuals, and exams, awarding you with professional certifications along the way.

BICSI offers increasing levels and types of Cabling Installers and Technicians.
