

NBASE-T in the Real World

Solving Your Customers' Problems Right Now

Peter Jones Cisco Systems, Principal Engineer & NBASE-T Alliance Chairman
Daniel Shin Cisco Systems, Technical Solutions Architect

**2018 BICSI WINTER
CONFERENCE & EXHIBITION**
Orlando, FL | February 4-8

What You Will Hear Today

- I'll start with NBASE-T
 - Alliance, technology and market
- Daniel will cover NBASE-T in the wild
 - Opportunities and successes
- I'll wrap up
 - Closing thoughts and call to action

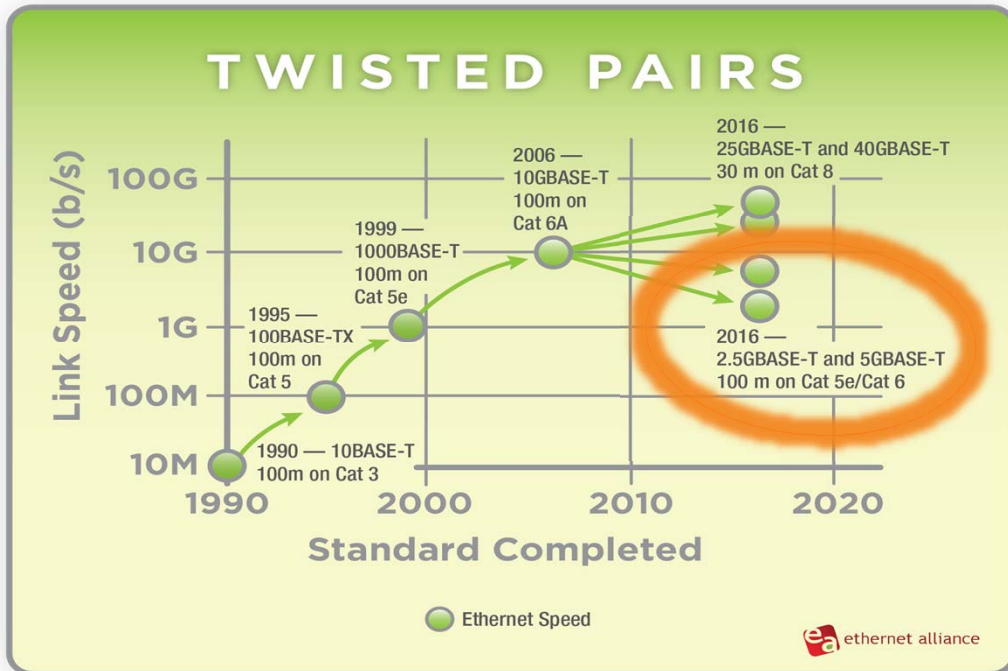

**2018 BICSI WINTER
CONFERENCE & EXHIBITION**
Orlando, FL | February 4-8

NBASE-T OVERVIEW

**2018 BICSI WINTER
CONFERENCE & EXHIBITION**

**2018 BICSI WINTER
CONFERENCE & EXHIBITION**
Orlando, FL | February 4-8

BASE-T & Alien Crosstalk

- Modern BASE-T PHYs ($\geq 1\text{Gb/s}$) are impacted by “Alien Crosstalk” from other cables
 - Cables tightly bundled over long distances and/or close to the transmitter impact performance
- With NBASE-T many links can support rates $> 1\text{Gbps}$
 - Links to Wireless Access Points fan out, reducing alien crosstalk
- Cat5e/Cat6 not specified for alien crosstalk

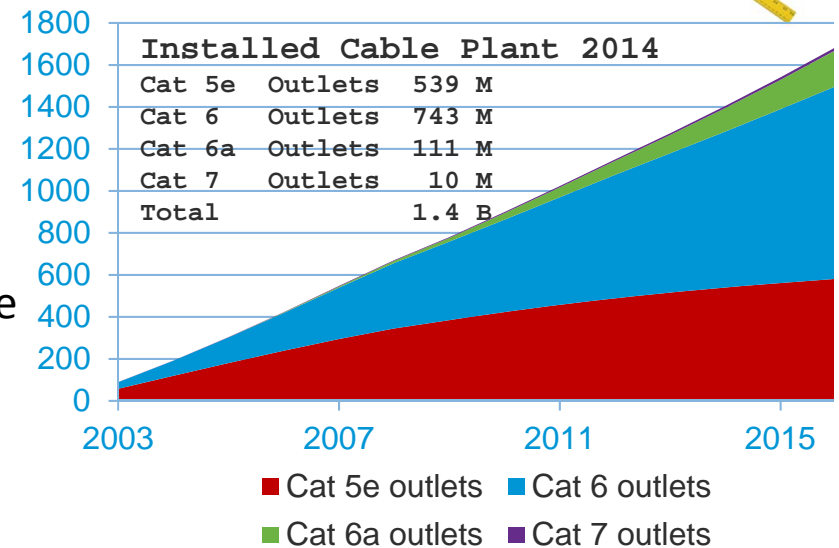

**2018 BICSI WINTER
CONFERENCE & EXHIBITION**
Orlando, FL | February 4-8

Why 2.5G and 5G BASE-T?

- Between 2003 to 2014 ~70 billion meters of Cat 5e and Cat 6 cabling were sold....
 - ~90% of installed base
 - Enormous network infrastructure investment
- Existing specifications supported 1Gb/s over this cable, but we knew faster data rates were possible
- BASE-T allows incremental upgrade

10 meters of
BASE-T cabling
for every man, woman,
and child on Earth ...

NBASE-T/802.3bz Timeline

Updated December 2017, © NBASE-T Alliance, Inc

**2018 BICSI WINTER
CONFERENCE & EXHIBITION**
Orlando, FL | February 4-8

NBASE-T and 802.3bz Technology Based on 10GBASE-T

- PAM-16 with the same LDPC code for good performance
 - Good interoperability, improved robustness
 - Upper frequency of $\frac{1}{2}$ (5G) and $\frac{1}{4}$ (2.5G) that of 10GBASE-T
- NBASE-T and 802.3bz are interoperable with each other
 - Joint Ethernet Alliance/NBASE-T Alliance plugfests in late 2016 & 2017
 - Auto Negotiation enables multi-mode PHY operation
- Supports PoE!

IEEE 802.3bz or NBASE-T

- NBASE-T adds “Downshift” to 802.3bz
 - Ethernet Auto Negotiation selects the fastest common rate (regardless of cable etc.)
 - With Cat5e/6, bandwidth capacity can depend on crosstalk from other links
 - Downshift automatically selects the speed based on the channel noise
- With downshift, users always get a reliable link

**2018 BICSI WINTER
CONFERENCE & EXHIBITION**
Orlando, FL | February 4-8

NBASE-T vs IEEE 802.3bz

Feature	NBASE-T	IEEE 802.3bz
Auto-Negotiation	Clause 28/55 for 10G - modified to use Extended page with NBASE-T OUI	Clause 28/55/126 - Infield message during training
Fast Retrain	Specified in ENG-977716 Revision 2.0	Clause 126 – Infield message during training for fast retrain ability advertisement
Energy Efficient Ethernet	NBASE-T PHY 2.3 - Clause 126 - Infield message during training, as per 802.3bz. (Note NBASE-T PHY 1.x EEE using extended next page is deprecated)	Clause 126 - Infield message during training for EEE ability advertisement
Downshift – Change speed in case of cable issues	Yes – adjust data rate in case of issue due to cable and noisy environment – see section 2.11	No – NBASE-T feature ONLY
2.5G MDI Return Loss	2.5G spec to 125MHz 5G spec to 250MHz	2.5G spec to 250MHz 5G spec to 250MHz

BASE-T AutoNeg enables 802.3bz/ NBASE-T co-existence

NBASE-T Downshift selects lower data rate if link establishment fails
<http://www.nbase-t.org/technology/library/nbase-t-downshift-optimization-2-5gbs-5gbs-ethernet-data-rates-cat5ecat6-cabling/>

NBASE-T/802.3bz MDI Return Loss harmonized via 802.3 Maintenance Request

Typical Enterprise Network Structure

- Three tier design
- Proven, stable, adaptable
- BASE-T **downlinks** from access switches

**2018 BICSI WINTER
CONFERENCE & EXHIBITION**
Orlando, FL | February 4-8

Questions & Answers

Three questions:

1. Why > 1Gb/s access?
2. Pre NBASE-T roadblocks?
3. Value of NBASE-T?

Three answers:

1. Evolve to a smart network edge.
2. Installed cabling.
3. Leverage biggest asset, enable network evolution.

Enterprise Wireless – UBC Network

University of British Columbia – Network Overview

“As one of the world’s top research universities, the University of British Columbia has created positive change at home and abroad for more than a century. Today our two major campuses—in Vancouver and the Okanagan— attract, nurture and transform more than 60,000 students from Canada and 140+ countries around the world.”

Scientific Compute – Monash University

Australian public research university Melbourne, Aus.

Founded in 1958

73,807 Students (50,461 + 22,848)

In 2016, Monash was ranked in the world top:

20% in teaching

10% in international outlook

20% in industry income

10% in research

<https://www.monash.edu/>

https://en.wikipedia.org/wiki/Monash_University

Sir John Monash once said...."Adopt as your fundamental creed that you will equip yourself for life, not solely for your own benefit but for the benefit of the whole community."

Who we are - At Monash, the desire to make a difference informs everything we do. But we go beyond good intentions. We make an impact, both locally and internationally. We are a global university with a presence on four continents. And our plans for the future are ambitious.

Our world university rankings - At Monash, we take our reputation seriously. Monash has achieved an enviable national and international reputation for research and teaching excellence in a short 50 years. Monash is ranked in the top one per cent of world universities.

NBASE-T Wrap-up

- NBASE-T provides 2.5Gbps and 5Gbps over installed cabling
 - Interoperable with IEEE 802.3bz (2.5GBASE-T and 5GBASE-T)
 - NBASE-T Downshift adapts to cabling to achieve the best performance
- NBASE-T supports use cases (including 802.11ac Wave 2) at > 1Gbps
- Cabling standards and guidelines for NBASE-T/802.3bz on the way
- Field test procedures to maximize performance are available

How can you make use of NBASE-T?
